Professional Summary

Results-driven MERN Stack Developer with hands-on experience architecting and delivering scalable, full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proven ability to build secure, high-performance, user-centric platforms — including a full-stack LMS with role-based access control — improving frontend load time by 20% through optimized rendering and code-splitting. Skilled in designing RESTful APIs, implementing JWT and email OTP-based authentication, and integrating cloud/BaaS services (Cloudinary, Appwrite) to translate business requirements into clean, maintainable, production-ready code.

Key Highlights

- Delivered 3 full-stack MERN / Appwrite applications end-to-end — an LMS, an Employee Management System, and a blog platform — covering role-based authentication, real-time data handling, and responsive UI.
- Improved frontend load time by 20% through performance optimization, efficient state management, and code-splitting.
- Engineered secure JWT-based authentication with email OTP verification and protected routing, strengthening application security and session management.
- Designed and integrated RESTful APIs and BaaS services (Appwrite) to enable seamless communication between React front ends and Node.js / Express or Appwrite back ends.
- Built reusable, modular React component libraries following MVC principles, improving maintainability and speeding up delivery.

Core Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React.js, Redux, Tailwind CSS, Responsive Web Design
- **Backend:** Node.js, Express.js, RESTful API Development, MVC Architecture
- **Database & BaaS:** MongoDB, Mongoose (NoSQL), Appwrite (Auth, Database, Storage)
- **Authentication & Security:** JWT Authentication, Email OTP Verification, Protected Routes, Role-Based Access Control
- **Cloud & Tools:** Cloudinary, Git, GitHub, Postman, VS Code, NPM, Vercel
- **Concepts & Practices:** Full-Stack Web Development, Software Development Life Cycle (SDLC), Agile Methodology, API Integration, Debugging & Troubleshooting, Cross-Browser Compatibility, Version Control

Projects

Learning Management System (LMS)

React.js | Node.js | Express.js | MongoDB | Tailwind CSS | Cloudinary

- Architected a full-stack LMS supporting Student, Instructor, and Admin roles with role-based access control for secure, personalized experiences.
- Engineered JWT-based authentication with email OTP verification, strengthening account security and preventing unauthorized access.
- Built end-to-end course creation, enrollment, and video-based learning modules, enabling instructors to publish and manage multiple courses.
- Developed a real-time progress-tracking system for students to monitor course completion and learning milestones.
- Integrated Cloudinary for scalable video/image upload and media management, streamlining content delivery across the platform.

Employee Management System (EMS)

MongoDB | Express.js | React.js | Node.js

- Developed a full-stack Employee Management System using the MERN stack.
- Designed a responsive, user-friendly interface to manage employee records — add, update, delete, and search.
- Integrated REST APIs for seamless communication between frontend and backend, streamlining data flow.

Dil Se Diary — Blog Application

React.js | Tailwind CSS | Appwrite (Backend-as-a-Service)

- Architected a full-stack-style blog platform in React.js with Appwrite powering authentication, database, and storage.
- Implemented secure user authentication with protected routes via Appwrite Auth, including login and signup workflows.
- Developed CRUD functionality to add, edit, and delete posts, with image upload and live preview handling using Appwrite Storage.
- Designed a fully responsive UI using Tailwind CSS, prioritizing reusability and maintainable code.

Education

Master of Computer Application (MCA) — Maharshi Dayanand University (MDU) | Pursuing

Bachelor of Computer Application (BCA) — MAHGU | 2021 – 2023

Languages

Hindi, English
